

# Malaria Rapid Diagnostic Tests: Laboratory aspects in the diagnostic setting

Philippe Gillet

Supervisor:

Prof. dr. C.A. Bruggeman

Co-supervisor:

Prof. dr. J. Jacobs, Institute of Tropical Medicine Antwerp, Belgium

Assessment Committee:

Prof. dr. M.P. van Diejen-Visser

dr. G. Schreij

Prof. dr. C.D.A. Stehouwer

Prof. dr. A.J.A.M. van den Ven,  
International Health, Radboud Universiteit, Nijmegen

## Contents

Chapter I: Introduction and outlines of this thesis .....	3
Chapter II: Laboratory evaluation of malaria RDTs targeting <i>P. vivax</i> .....	19
IIa: Laboratory evaluation of malaria RDTs targeting <i>P. vivax</i> .....	21
IIb: Laboratory evaluation of malaria RDTs targeting <i>P. vivax</i> .....	35
Chapter III: Assessment of the prozone effect in malaria RDTs.....	49
IIIa: Assessment of the prozone effect in malaria RDTs.....	51
IIIb: Assessment of the prozone effect in malaria RDTs .....	65
Chapter IV: Buffer substitution in malaria rapid diagnostic tests causes false-positive results. ....	87
Chapter V: External quality assessment on the use of malaria rapid diagnostic tests in a non-endemic setting .....	103
Chapter VI: Malaria rapid diagnostic kits: quality of packaging, design and labelling of boxes and components and readability and accuracy of information inserts.....	127
Chapter VII:	
Summary, general discussion and future perspectives .....	157
Samenvatting, algemene discussie en toekomst perspectieven .....	167
List of publications .....	177
Curriculum Vitae .....	179
Acknowledgments .....	180
